PROFESSIONAL SUMMARY

Motivated UI/UX Designer and Computer Science graduate with hands-on experience designing mobile and web interfaces end-to-end in Figma. Skilled in wireframing, high-fidelity mockups, interactive prototyping, and building component-based design systems. Familiar with the complete design process from user research and flow mapping through to developer handoff. A complementary front-end background enables strong collaboration with engineering and product teams. Seeking to grow in a product design environment and contribute to visually refined, user-centred digital experiences.

CORE COMPETENCIES

- UI Design & Visual Design
- UX Research & User Flows
- Wireframing & Hi-Fi Mockups
- Interactive Prototyping
- Design Systems & Components
- Mobile-First Design
- Interaction & Micro-interactions
- Usability Evaluation
- Design-to-Dev Handoff
- Information Architecture
- Cross-Functional Collaboration

TECHNICAL SKILLS

Design Tools	Figma — UI Design, Auto Layout, Components, Prototyping, Design Systems, FigJam
Front-End	HTML5, CSS3, JavaScript — for UI implementation and design feasibility
Programming	C, Java, Python (Pandas, NumPy, TensorFlow), SQL, SQLite3
Other	Git, Windows & Linux, Ticketing Systems, Technical Documentation

UI/UX DESIGN PROJECTS

RITHOS — Lifestyle Brand Mobile App *Figma · Mobile UI/UX*
End-to-end mobile UI/UX design for a premium lifestyle and fashion brand

- Designed full mobile UI — onboarding, product discovery, detail pages, cart, and checkout flows
- Built a scalable component library with unified typography, colour tokens, and spacing rules
- Produced a linked interactive Figma prototype demonstrating the complete end-to-end user journey

View Design | **View Prototype**

AURUM STAYS — Luxury Hotel Booking App *Figma · Mobile UI/UX*
Premium accommodation booking app with high-end visual identity and seamless booking UX

- Designed high-fidelity screens for property search, room detail, filtering, and booking confirmation
- Crafted an editorial visual language using rich imagery, refined typography, and a gold accent palette
- Mapped task journeys and validated the full booking flow with a fully interactive prototype

View Design | **View Prototype**

EcoStsy — Sustainable Lifestyle App *Figma · Mobile UI/UX*
Eco-conscious lifestyle platform for sustainable product discovery and environmental impact tracking

- Designed a nature-inspired UI with an earthy palette, strong visual hierarchy, and clean IA
- Structured intuitive navigation across product browsing, impact tracking, and community sections
- Applied accessible design principles — sufficient contrast ratios, legible typography throughout

View Design | **View Prototype**

PickNear — Hyperlocal Pickup & Delivery App *Figma · Mobile UI/UX*
Location-based app connecting users with nearby stores for fast, convenient local pickup

- Designed location-aware flows covering store discovery, order placement, and live pickup tracking
- Built a reusable component system for consistency across listing, cart, and order status screens

- Prototyped the multi-step checkout and real-time tracking journey for usability validation

OTHER PROJECTS

Personal Portfolio Website *2024*
Tools: HTML5, CSS3, JavaScript

- Designed and built a fully responsive personal portfolio with clean UI, smooth navigation, and mobile-first layout

GitHub | Live

Green AgriHub — Agriculture Website *2023*
Tools: HTML5, CSS3, JavaScript

- Built a responsive agriculture-focused website with a clean UI, dynamic sections, and structured layout

GitHub

PROFESSIONAL EXPERIENCE

IT Support & Systems Assistance *2023 – 2024*
Daffodil International University

- Provided technical support for software, connectivity, and authentication issues for university users
- Logged and documented incident resolutions; communicated clearly with non-technical stakeholders
- Assisted with LAN setup and basic networking tasks (DNS, DHCP configuration)

EDUCATION

BSc in Computer Science and Engineering *Graduated 2024*
Daffodil International University, Dhaka

Focus Areas: Data Analysis, Machine Learning, Web Technologies, Human-Computer Interaction

PUBLICATIONS

- **Burmese Grape Leaf Disease Dataset for Computer Vision-Based Plant Diagnosis** — *Data in Brief*. Co-authored dataset and CV research for automated plant disease diagnosis.
- **Diagnosing Jujube Leaf Diseases via Image Classification** — *Varendra University Conference*. Deep learning model trained on 2,819 images.

CERTIFICATIONS

- **Power BI Data Analyst Associate (PL-300)** — *In Progress*
- **Data Analytics Job Ready Program** — *Ostad*
- **AI+ Prompt Engineer Level 1** — *AI Certs*
- **Microsoft 365 Copilot** — *Microsoft*
- **Agent X** — *NetCom Learning*

VOLUNTEERING

Volunteer — I2I Fresh Graduate Program *September 2025*
Skill Jobs

Coordinated logistics for 200+ participants; supported end-to-end event execution.
